

NOAA Weather Radio

Station KIG – 75 includes

broadcast area includes Yakima and Kittitas Counties.

Severe weather watches, warnings, and special weather statements when needed.

Programming on

Hydrologic statements such as flash flood warnings and watches when needed.

Extended forecast up to 7 days for Eastern

Forecasts for the Yakima and Kittitas Valleys and the East Slopes of the Southern

Washington. Outlook up to 14 days.

Washington Cascades.

Hourly regional weather reports. Climate and statistical data.

Non-weather emergency information when

needed.

During potentially dangerous weather events, NOAA Weather Radio programing may be interrupted to issue warnings. If your weather radio alert receiver

is in a standby position it should automatically alarm

to inform you of warnings. NOAA Weather Radio is

an important part of the Emergency Alert System

For more information concerning NOAA Weather Radio please contact National Weather Service

2001 NW 56th Drive Pendleton, OR 97801 541-276-7832 ext 223 http://www.wrh.noaa.gov/pendleton

The broadcast originates from NOAA's National Weather Service (NWS) in Pendleton and transmits

from Yakima Ridge near Yakima on a frequency of 162.550 MHz. Continuous updates are provided. Any radio with the weather frequency can receive the broadcast, though reception quality will depend

upon terrain and distance from the transmitter. Specially built weather radios have the ability to alert you when the NWS issues a weather warning. Weather radios are sold at electronic stores and many discount and department stores. A list of

weather radio manufacturers can be found at http:-//www.nws.noaa.gov/nwr KIG-75 part of 162.400 MHz
